

Tobias Rønne Wolmar

Frontend developer

Profile

Frontend developer with a focus on performance, quality, and user experience

I have recently completed my Professional Bachelor's degree in Web Development and am seeking new challenges. I am quick to learn, dedicated, and highly motivated to contribute within a team while continuously developing my professional skills. Throughout my studies, I have gained solid experience in both frontend and backend development, giving me a strong understanding of the entire development process. I also have hands-on experience as a frontend developer at IMPACT through an internship, where I was part of a development team working on a large-scale client project. In this role, I worked with Next.js and TypeScript, focusing on feature development and performance optimization.

- React, Next.js
- TypeScript, JavaScript
- CSS, Tailwind CSS
- Core Web Vitals
- Git
- Jira
- SQL
- PHP
- MongoDB
- Supabase

Languages

- Danish - Native
- English - Fluent

Work experience

- Frontend developer** August 2025 - December 2025
IMPACT (internship)
During my time at IMPACT, I worked with React using Next.js and TypeScript as part of a development team. We followed an agile workflow based on Scrum. I was assigned to a large client project with a special focus on performance optimization. I was responsible for improving the company's Core Web Vitals, resulting in all metrics being greatly improved. Throughout the project, I placed a strong emphasis on code quality, stability, and delivering a great user experience.
- Shift manager** 2022 - 2026
Føtex
- Sales associate** 2020 - 2021
Koa Group
- Customer service / store supervisor** 2015 - 2022
Bilka

Education

- Web Development – Bachelor's Degree** 2024 - 2026
Business Academy Aarhus
During the Web Development program, I have gained strong competencies in modern full-stack development. I have worked with the entire development process—from databases and APIs to frontend development—both independently and as part of development teams. I have primarily worked with React, using Next.js and React Router as frameworks.

Education

- **Multimedia Design** 2022 - 2024
Business Academy Aarhus
During the Multimedia Design program, I gained skills in digital design and web development. I chose frontend development as an elective, where I gained hands-on experience with React and modern web development practices. In addition to web development, I also worked with graphic design, motion design, and UX/UI design.
- **STX** 2015 - 2018
Horsens Statsskole
